David Uche

Mobile and Product Engineer

Lagos, Nigeria · acarsondev@gmail.com · linkedin.com/in/uche-chimdindu-david · github.com/acarsondave

7+ years building mobile apps and the backends behind them. I work in Flutter, React Native and TypeScript, and take products from the first screen to the store release.

Experience

Lead Mobile Engineer, Moneque Jul 2026 – present

Naira wallet, live on Google Play · Flutter, Riverpod, TypeScript on Cloudflare Workers, PostgreSQL

- Lead the iOS and Android app: transfers, bill payments, virtual dollar cards, crypto and identity verification.
- Integrated six payment and identity providers behind the API: Flutterwave, Korapay, Swervpay, VTpass, Quidax and Didit.
- Built the double-entry ledger with idempotency keys, so a retried transfer or a replayed webhook never posts twice.

Mobile and Backend Engineer, RealtyConnect Sep 2026 – present

Property app for a Hong Kong team · Flutter, TypeScript on Cloudflare Workers (D1, R2, Queues), React

- Built the iOS and Android app for agents and buyers in English and Traditional Chinese, plus the REST API and admin console.
- Smart paste turns a WhatsApp listing into a typed form. On 20 held-out messages, rules alone got the hardest field right 80% of the time; with an LLM pass, 100%.
- Load-tested the API with k6 (43,253 requests) and fixed the two scaling bugs it found.

Founder and Lead Engineer, ACARSON LLC May 2023 – present

US company shipping my own products

- **Pingcharm**, on the App Store: AI reply assistant in React Native with a Swift keyboard extension that reads the chat using on-device OCR.
- **MiniRec**, minirecc.com: school and course recommendations on Next.js, Prisma, PostgreSQL and Redis workers, with Paystack and Stripe.
- **Foldbooth**: party camera with shared event albums, in Flutter with a native Swift camera plugin.

Lead Instructor, Oceangate Tech Academy Jan 2025 – May 2025

Taught cybersecurity and AWS cloud classes, with hands-on labs.

Python Developer, Upwork (independent) Nov 2020 – Apr 2023

Python scripting, automation and data cleanup for clients.

Skills

Mobile: Flutter, Dart, Riverpod, React Native (Expo), Swift, Xcode

Backend: TypeScript, Node.js, Python, PostgreSQL, Redis, Cloudflare Workers (D1, R2, Queues)

Shipping: GitHub Actions, Xcode Cloud, TestFlight, Play Console, golden and integration tests, Crashlytics

Education

B.Sc. Computer Science, University of Lagos, 2019 – 2022
